

NITRITE, AMINE AND
BORATE FREE,
TO PROTECT YOUR ENGINE WHILE
SAFEGUARDING HEALTH AND THE
ENVIRONMENT.

GREEN TECH.

The new coolant for latest generation DEUTZ-FAHR tractors.
Maximum protection against corrosion, overheating and
silicate deposits.

NEW COOLANT.

FORMULATED TO OFFER OUTSTANDING PROTECTION AGAINST CORROSION, OVERHEATING AND FREEZING, CARING FOR BOTH YOUR ENGINE AND THE ENVIRONMENT.

DEUTZ-FAHR Green Tech is an ethylene glycol based coolant containing a **corrosion inhibitor** package based on salts of organic acids, phosphate and silicate (PSi-OAT coolant) and **containing no nitrites, amines or borates**, which are harmful to both human health and the environment.

The new improved formula prevents the formation on silicate deposits, protecting not only the engine but the entire cooling system, from the coolant passages in the cylinder block and head to the heat exchanger and the water pump.

Green Tech SDF Green Tech coolant is pre-diluted and ready to use, and replaces the DEUTZ-FAHR Coolant and Freeze products specified for all engines currently in production*.

Green Tech has been developed for latest generation engines with high specific power outputs requiring advanced coolants and lubricants, and may improve the performance of less recent engines.

Quantity	P/N
4 Lt	04439702.3/L
20 Lt	04439702.2/L

TECHNICAL CHARACTERISTICS.

The new formula offers significant improvements in terms of both performance and protection:

- Improved **heat dissipation**
- Improved **corrosion protection**
- Improved **cavitation protection**
- Greater **stability in terms of precipitate formation.**

Standard coolant

In the event of contact with electronegative elements such as zinc and fluorine, the silicate contained in coolants precipitates from the aqueous solution and deposits on the surfaces of the head.

DF Green Tech

The new protective formula of Green Tech has been specifically developed to offer greater stability in terms of precipitate formation, to keep you engine perfectly clean.

* With improved characteristics over all previous products, Green Tech may substitute Coolant and Freeze products for all existing DEUTZ-FAHR tractors. DEUTZ-FAHR recommends using only Green Tech for all new generation engines.
